Summary

Data Analyst with a strong foundation in data analysis and visualization, skilled in tools like SQL, Python, Power BI, and Advanced Excel. Experienced in analyzing large datasets to derive actionable insights and presenting findings through dashboards and reports.

Technical Skills

- Programming & Analysis: Python (Pandas, NumPy, Matplotlib, Seaborn)
- Data Tools: SQL, Power BI, Advanced Excel
- Other Skills: Data Cleaning, Statistical Analysis, Dashboard Development, Linux Terminal

Professional Experience

Intern – LetsGrowMore

- Developed machine learning models for predictive analysis, enhancing skills in data manipulation and AI algorithms.
- Conducted exploratory data analysis to identify trends and patterns.

Projects

Uber Data Analysis Project: Analyzed ride data to identify peak usage times, user behavior, and profitability by geography.

Bitcoin Share Price Analysis: Explored Bitcoin data to study trends, volatility, and price movement correlations.

Madhav E-commerce Project: Built dashboards and analyzed sales data for insights on high-demand products.

Vrinda Store Analysis: Created dashboards and annual reports, showcasing sales by category and customer profitability.
